Strategy Overview – Fourth Quarter 2021

International Strategy

Investment Philosophy

The International strategy invests in stocks that we believe are intrinsically undervalued and exhibit strong or improving fundamental characteristics. The strategy invests in companies of all sizes and domiciles with a primary focus on developed countries that we believe have superior long-term risk/reward potential.

Inception Date: December 31, 2017

Portfolio Manager: Masa Hosomizu, CFA

Investment Approach

Exploiting short-term pricing anomalies to uncover mispriced future value creation

Emphasis on Quality

- Positive correlation between a company's long-term ability to create value and the quality of its underlying operations
- Durability of business model, financial strength, presence of long-term growth, and value-accretive management

Exploiting Semi-Efficient Markets

- Prices periodically deviate from intrinsic values due to a combination of fundamental developments and behavioral investment biases
- Realize excess returns by exploiting pricing anomalies and investing in companies that sell below their conservatively estimated intrinsic values

Timely and Objective Fundamental Approach

- Emphasize long-term fundamentals and ignore near-term noise
- Long-term investment horizon provides sufficient time for investments to reach their full worth

Protection Against Permanent Loss of Capital

- Purchase quality, growing companies at prices below their intrinsic values to obtain future value creation potential at a discount
- Provide downside protection and enhance upside potential
