

Investment Philosophy

We analyze companies and construct portfolios through the lens of the Corporate Life Cycle. Companies generally progress through five stages: accelerating, compounding, maturing/renewal, maturity, and turnaround. We believe every company can be categorized in one of these stages. We believe that investing in companies that are allocating capital consistent with their position in the Corporate Life Cycle while controlling for portfolio risks will result in positive returns over time.

Investment Approach

The International Strategy (“the Strategy”) is a portfolio of primarily high-quality, developed-market non-U.S. stocks.

We apply a disciplined, fundamental research process to invest in what we think are well-managed companies from various stages of the Corporate Life Cycle. We utilize our unique corporate performance and valuation framework to identify companies we believe can exceed market expectations. The team also leverages Curi RMB Capital’s proprietary risk model to construct a portfolio that reflects the high conviction investments of the underlying portfolios while reducing outsized factor risks.

High Quality

We focus on management teams that we believe allocate capital appropriately for the company’s Life Cycle stage, are working to improve their competitive position, and that maintain healthy balance sheets.

Portfolio Construction

The portfolio is constructed with sufficient concentration, appropriate sector and Life Cycle diversification, and prudent position sizing.

Investment Risks

All investment incurs the potential loss of the principal investment due to risks associated with the market, sector focus, and company-specific investing, and international investing includes foreign and geopolitical investment risk, the potential for international conflicts, political instability, government policy shifts, or cross-border tensions to negatively impact asset values, disrupt supply chains, or cause financial losses. It encompasses threats like wars, trade wars, sanctions, and regulatory changes. See Curi Capital’s Form ADV Part 2A for more detail and other potential risks of investing.

While “high-quality” has no single, strict industry definition, we define high-quality stocks as those that we believe offer more reliability and less risk based on a set of clearly defined fundamental criteria including hard criteria (e.g., balance sheet stability, operating efficiency, enterprise life cycle) and soft criteria (e.g., management credibility). We define well-managed companies as those that intentionally grow assets when their economic return on capital is above the cost of capital, are willing to shrink assets when economic return is below the cost of capital and actively seek to improve economic return when it is approximately equal to the cost of capital.

Performance	Quarter	YTD	1 Year	3 Years	5 Years	Since Inception (12/31/2017)
International Composite (net of IM fees)	+13.58%	+13.88%	+27.43%	+15.54%	+8.16%	+5.04%
International Composite (net of IM & WM fees)	+13.31%	+13.30%	+26.18%	+14.43%	+7.11%	+4.01%
MSCI EAFE Index	+10.82%	+9.44%	+20.23%	+16.44%	+9.05%	+7.87%

Inception date: December 31, 2017. Performance for periods of greater than one year is annualized. Please see important disclosures at the end of this document. Past performance is not indicative of future results, and there is a risk of loss of all or part of your investment. Data as of June 30, 2026. Investment management (IM) fees are charged for managed investment accounts, is intended to compensate the portfolio managers for their time and expertise for selecting investments and managing the specific strategy as well as other items, such as investor relations expenses and the administration costs. Wealth management (WM) fees are charged to cover the construction and management of a portfolio and the holistic wealth management services that a client has chosen beyond their investments including, but are not limited to, estate planning, tax strategies (and related services), risk management, financial planning, retirement planning, investment advice, and insurance/banking oversight services. These fees vary by client and for this presentation the highest possible wealth management fees has been applied in these calculations.

Curi Capital, LLC ("Curi Capital") – International Composite // GIPS Report

Organization | Curi Capital is registered as an investment adviser with the SEC under the Investment Advisers Act of 1940. Prior to January 1, 2025, for the purposes of GIPS, the firm was defined as RMB Asset Management and only included the asset management business due to the difference in how its investment strategies and services were offered. Beginning January 1, 2025, Curi Capital's GIPS firm includes Wealth Management, Asset Management, Wealth Builder, and Family Office Services. Curi Capital claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Curi Capital has been independently verified for the periods April 1, 2005, through December 31, 2023. The verification report(s) is/are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Description | The International All Cap product reflects the performance of fully discretionary equity accounts, which have an investment objective of long-term growth using a portfolio of primarily small-, mid-, and large-cap international stocks and for comparison purposes is measured against the MSCI EAFE index. The inception date of the International Equity Composite is December 31, 2017, and the Composite was created on December 31, 2017. Valuations and returns are computed and stated in U.S. Dollars.

ANNUAL PERFORMANCE RELATIVE TO STATED BENCHMARK

Year End	Composite Assets			Annual Performance Results					
	Total Firm Assets as of		# of	Composite	Composite		Composite	MSCI EAFE	Composite
	12/31 (\$M)	USD (\$M)	Accounts Managed	Gross-of-Fees (%)	Net-of-Fees (%)	MSCI EAFE (%)	3-YR ST DEV (%)	3-YR ST DEV (%)	Dispersion (%)
2025	11,596.5	520.4	110	34.14	32.83	31.22	11.03	11.93	5.38
2024	6,885.9	345.9	121	1.00	-0.01	3.83	15.25	16.61	0.30
2023	6,235.5	378.9	123	13.45	12.36	18.24	14.88	16.61	0.25
2022	5,228.7	389.1	133	-15.99	-16.86	-14.45	18.75	19.96	1.29
2021	6,277.6	508.9	142	10.18	9.12	11.26	16.91	16.92	0.38

* Composite dispersion is reported as N/A when the information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

Fees | The standard management fee is 1.0% up to \$1 million of assets annually, 0.975% from \$1 million to \$3 million, 0.950% from \$3 million to \$5 million, 0.90% from \$5 million to \$10 million, 0.825% from \$10 million to \$25 million, and 0.75% above \$25 million. Net returns are computed by subtracting the highest applicable fee (1.00% on an annual basis) on a monthly basis from the gross composite monthly return, and the resulting monthly net figures are compounded to calculate the annual net return. Composite performance is presented on a gross-of-fees and net-of-fees basis and includes the reinvestment of all income. Gross-of-fees returns means it is net of transaction costs but gross of asset management fees and custodian fees. The annual composite dispersion is an asset-weighted standard deviation calculated for the accounts in the Composite the entire year. Risk measures presented are calculated using gross-of-fees performance. The returns are net of withholding taxes. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Minimum Value Threshold | There is currently no account minimum in the International All Cap Composite.

Comparison with Market Indices | Curi Capital compares its Composite returns to a variety of market indices. These indices represent unmanaged portfolios whose characteristics differ from the Composite portfolios; however, they tend to represent the investment environment existing during the time period shown. The returns of the indices do not include any transaction costs, management fees, or other costs. Benchmark returns presented are not covered by the report of independent verifiers. The benchmark for the International All Cap Composite is the MSCI EAFE Index, which for comparison purposes is fully invested and includes the reinvestment of income. The index data assumes reinvestment of all income and does not account for fees, taxes, or transaction costs. The performance of the MSCI EAFE® Index assumes the reinvestment of all distributions but does not assume any transaction costs, taxes, management fees or other expenses. It is not possible to invest directly in an index. MSCI Europe, Australasia, and Far East (EAFE®) Index is an equity index which captures large- and mid-cap representation across Developed Markets countries around the world, excluding the U.S. and Canada. The returns are net of withholding taxes.

Other | Past performance is no guarantee of future performance. Historical rates of return may not be indicative of future rates of return. Individual client performance returns may be different than the composite returns listed. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. A list of Composite Descriptions and a list of Broad Distribution Pooled Funds are available upon request.
